

## BUSINESS CASE: ASPHALION'S EXPERIENCE WITH PV inspections

### Case Study Analysis: International company with global reach

#### CHALLENGE

The company faces a PV inspection

**Outcome: 34 findings,**  
4 of them **critical.**

The **EU-QPPV** lacked sufficient **oversight** and **control** of the PV system.

The company **lacked** an **adequate PV** system and **qualified personnel.**

**Asphalion, key to the setup of a robust PV system**

#### SOLUTION

The company outsources PV activities to Asphalion

**Asphalion created a robust transition plan focused on 3 phases.**

1

**Support with CAPA plan**

2

**Definition of a robust set up**

3

**Creation and maintenance of a strong and compliant PV system**

#### OUTCOME

The company received a second inspection from authorities

**Only 8 minor findings** were identified.

The inspection was conducted based on a **detailed plan** developed by Asphalion's team, **working hand-in-hand with the client** to ensure successful results.

The EU-QPPV outsourced to Asphalion demonstrated complete oversight of the PV system.
