

Prepare your PMS data for the upcoming regulatory milestones

Automated PMS data review services for ISO IDMP readiness, transforming PMS into a strategic advantage

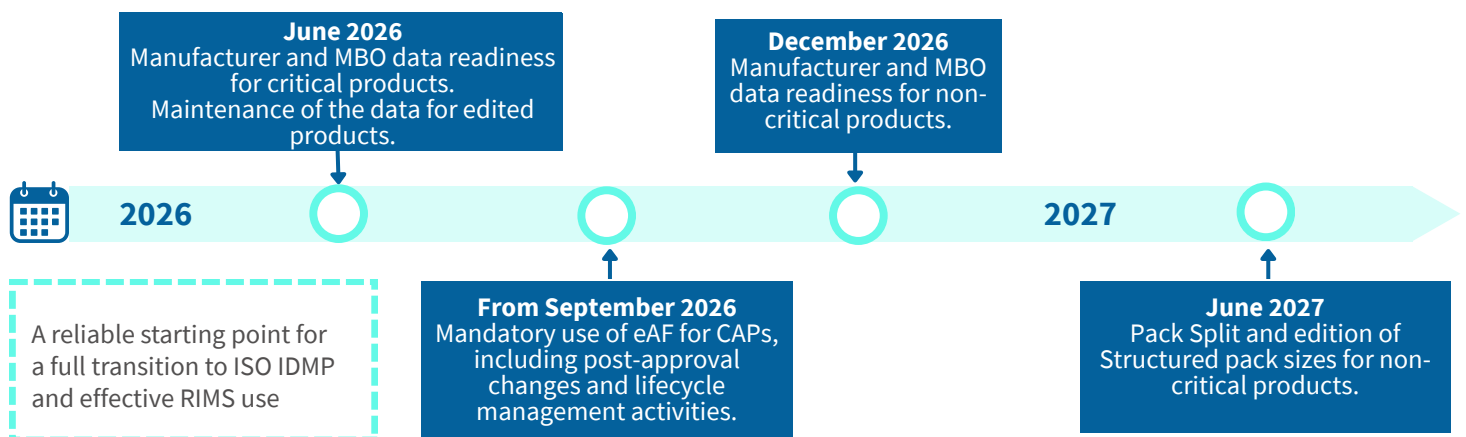

As the transition to ISO IDMP implementation progresses, reliable **PMS data is no longer optional**.

Asphalion supports Marketing Authorisation Holders with a specialised **PMS data review service** designed to **identify discrepancies, validate migrated data** and **accelerate remediation** actions.

Our approach combines regulatory expertise and automated validation to strengthen data quality, reduce risk, and support a confident transition to ISO IDMP.

Why now?

Our PMS data review service supports your preparation for the key priorities:

How can Asphalion support you?

- Complete PMS data extraction.
- Automated verification of PMS data consistency against xEVMPD and relevant source data.
- Automated application of defined migration rules and exception checks.
- Identification of migration discrepancies and data quality issues.
- Qualitative and quantitative assessment of findings.
- Remediation strategy and operational support.
- Automated re-verification: Corrective actions effectiveness check.

Benefits

Improved data accuracy in PMS

Faster review cycles through automation-enabled checks

Greater confidence for IDMP enrichment and downstream submissions
